

Stacking between low and high altitudes

Vaculex TS is a unique lifting aid, specially designed to solve problems of handling objects between high and low altitudes. The unique solution makes it easy to grab and release products even at levels far above the operators head. The design of Vaculex TS also makes it possible to pick up goods from the floor without bending over to reach the object.

When not using a lifting aid, this type of repetitive lifting is hard and demanding on the body and muscular skeletal injuries are common. An investment in Vaculex TS is a small but extremely effective measure in reducing sick leave and rehabilitation costs. In addition a more safe and healthy working environment attracts and maintains good quality employees.

Vaculex TS is the best investment choice as our vacuum tube lift addresses all the vital factors. Vaculex TS is tremendously user-friendly and does not need any time consuming training to operate. It is so easily managed that working speed and productivity are maintained or in many cases increased, which is usually the contrary when using a lifting aid.

- Ergonomic
- Less risk of strain injuries
- Quick to learn
- User-friendly
- Increase productivity
- Low investment cost
- Low service cost

Thanks to Vaculex TS ergonomic design, the operator avoids problems with back and knees when lifting.

Vaculex TS is available with a variety of accessories and can easily be customized to meet your specific needs.
